EXPERIENCE

Girls Who Code Summer Intern, Pixar Animation Studios— *Student*

July 2016 - August 2016

During my seven weeks at Pixar I learned how to code in different languages, specifically Python, HTML, CSS, and JavaScript. There I created my own website, which is still in the works, learned a little robotics, and built a game called Splat. Splat is a game created to relieve stress as well as be an artistic outlet for users.

HOBY, Sacramento State University — *Student*

June 2016 - June 2016

I was one of the two students chosen from my school to represent San Domenico at a weekend leadership seminar. In just two days, I learned my strengths and weaknesses as a leader. I went through a life–changing experience I could only have had at HOBY. By asking questions and doing a lot of self reflection, I desire to be a leader that is aware of her surroundings and can improve her community by using her talents and collaborating with others to get the job done.

EDUCATION

San Domenico School, 1500 Butterfield Road, San Anselmo, CA 94960— *Class of 2018*

August 2014 - June 2018

From the beginning of my high school education, I took a hold of as many opportunities as I could. During my freshman year I jumped into musical theatre. It quickly became an important part of me as an artist. In my sophomore year my leadership skills proved impressive as I was one of the two students chosen from my entire school to be a part of HOBY.

SKILLS

Dance/Choreography

Photography

Poetry

Adobe Photoshop

Musical Theatre

Publications

Accolades: 2014 Poetry Collection, The America Library of Poetry

December 2014

"The Songs" by Nia Coffer

Eloquence: 2015 Poetry Collection, The America Library of Poetry

December 2015

"Circle of Life" by Nia Coffer

LANGUAGES

English

Basic knowledge of Python

Basic knowledge of HTML

Basic knowledge of CSS

Basic knowledge of JavaScript

Splat

A stress relieving game that allows the user to bang the letter keys on their keyboard and paint splats will pop up on the screen. Music playlists have also been created for each of the five designs.

My Website

I first started creating this website during my internship with Girls Who Code. I will be putting my original pieces of work onto this website. From my photography to my poetry, the website will always be updated as I continue to discover new skills in my passions. I will be using HTML,CSS, and JavaScript to create this website.

Clubs

Black Student Union

Black Student Union returned in the middle of my freshman year at San Domenico School. Having become part of it I feel more confident in myself as a black girl and more proud of my heritage as an African American.

Impact Crew (Christian Youth Group), Hilltop Community Church

My youth group meets Wednesday nights at 7 p.m. as well as Sunday mornings at 11 a.m.

Volunteering

Helping with Preschool Children, Hilltop Community Church

I help clean up after the Sunday 11 a.m. service gets out. I also take care of children when special events take place.
